<u>Website Proposal</u>

I want to expand on my midterm and this time I want to add a shopping page and more images to describe each object. My midterm website was about rock climbing and its equipment. I think I want to add some animation where when you hover over the nav bar links they will bounce.

Typography:

Fonts:

https://fonts.google.com/specimen/Sekuya?preview.text=block (title)

https://fonts.google.com/specimen/BBH+Bogle?preview.text=block (headings)

https://fonts.google.com/specimen/Fira+Sans?preview.text=block (everything else)

Colors:

I want my colors to be bold, either black/yellow or yellow/blue

(EX, <u>YELLOW, BLUE,</u>(main colors) BLACK, AND WHITE)

White: main

Yellow: Nav, (Blue: Nav Text)

Footer: Blue, (Text: Yellow)

Animation:

 When hovering over the nav bar, it will bounce. (Maybe add more to nav bar)

Interaction Ideas: Using Jquery to press "see more" as the description for the products/shop

- Use javascript for a "click me" button! And expand the description

Shop Idea:

- Two big boxes, 4 max on one page

- "Read more" button, "Add to cart" button
